DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

 Claims 1 is directed to a method of preparing a liquid yet contains a limitation pertaining to using the liquid in a semiconductor polishing process. It is unclear what Applicant intends to claim be claiming - a method of preparing a liquid or a semiconductor fabrication process.

Claim 1 provides for the use of the degassified/regassified liquid in a polishing process, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

4. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakurai et al. (US 6,082,373).

Sakurai teaches a method of preparing an aqueous liquid by first degassifying the liquid and then regassifying the liquid so that the dissolved gas content is greater than 200 ppb. Sakurai teaches using the liquid as part of a chemical-mechanical polishing process which is a wet etch process. See: column 1, ln 66 - column 2, line 5; column 7, line 59 - column 8, line 20; example 10 beginning in column 13.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Olsen whose telephone number is (703) 306-9075. The examiner can normally be reached on Monday through Friday from 9:30 to 6:00.
